Test 11 — Model, View, Controller (Part 2)

C# Programming

This is a timed test. You have one hour to complete the test. When you finish the test, email me your deliverables as a zip archive, and let me know that you have finished. I will ask you to run your program so that I can see that it compiles and runs.

Write an ASP.NET MVC application. If you don't remember how, review chapter 3 of the text. Create a Person **model** with at least four properties, and a People **model** ad a repository that will contain Person objects. Create a **controller** that has two action methods, one that displays all Person objects, and one that allows yu to add a Person object to the repository. Create a **view** that displays your People and another view that contains an HTML form that will allow you to add a Person to your People repository. Your deliverables are as follows, preferably as a zip archive:

1. your model source folder (all classes),

2. your controller source code,

3. your view source code (all .CSHTML files), and

4. a screenshot of your running application.

Email me your deliverables. Do not push them to Github.
